

## Sunnybank Hills State School

Sunnybank Hills State School has received awards of excellence in music festivals for choir, string orchestra, symphonic winds and concert band. Their school musical, combined with dance and drama awards, chess competitions and premierships in interschool sporting competitions, reflect the diverse programs of excellence available to children from the surrounding communities.

### Compelling need for the project

Sunnybank Hills State School needed to accommodate an ever-increasing number of student enrolments, to support continual growth of the local communities.

### Celebrating key collaborators

**New General Learning Areas, outdoor learning areas and undercover areas with amenities, \$8.64M**  
**Sunnybank Hills, Queensland**  
**Wiley services delivered: demolition and construction**

### Business value created for the client

This project was the first stage of a master plan, providing capacity for future builds and ensuring the school and community are able to accommodate forecasted growth.

A key objective of this project was maintaining the school's operations during the delivery phase. Wiley education teams are highly-experienced working in operational environments, where safety is paramount. Our education clients appreciate our flexible approach to programming, ensuring minimal disruption to the school's curriculum program during the delivery stage.

### The challenging scope Wiley delivered

In the first phase, Wiley demolished modular buildings, shade structures, playground and associated amenities.

Wiley delivered a new architecturally designed, 2-storey building, containing:

- Nineteen General Learning Areas (GLA)
- Five outdoor learning areas
- Numerous large undercover areas and amenities
- Two outdoor courtyard areas

Wiley developed a well-planned delivery schedule, working with key client stakeholders, consultants, suppliers and subcontractors throughout the school's Christmas holiday period. This approach ensured the schools operations were maintained as much as possible.

*"It was fantastic to work with Sunnybank Hills State School who share our future-focussed values and understand the importance of master planning for future growth. We were impressed to see the consideration that had gone into designing flexible learning and break out areas, so that individual learnings are uninterrupted." Tom Wilson, Wiley Senior Project Manager*
